25X1 4. [] General Cabell called with regard to the memorandum concerning the request of the Joint Committee on Atomic Energy for lists of CIA studies and NIEs. General Cabell indicated he thought we should approach the problem with the Committee on the basis of many raw reports some of which get some evaluation but that then these are reflected in the over-all NIEs. Therefore, they were in fact receiving all finished intelligence. I indicated that in the past they had received studies as such and might question receiving solely NIEs. General Cabell then indicated that where there were studies with special material in it the Agency would simply have to prepare sanitized versions. General Cabell basically did not want to state to the Committee that there was certain material which we were not giving them since this probably would cause them to cite the law to us. I indicated to General Cabell that I was not sufficiently expert on the substantive material involved to say whether we could handle it along these lines but I would take it up with Dr. Scoville.

Subsequently, I relayed this to Dr. Scoville who seemed pessimistic but he will look into the matter and he will advise. In the meantime, General Cabell is holding this paper.

25X1 5. [] called to tell us about contacts which the Army has made with them concerning the

[]

25X1 6. [] Talked with Mrs. Parker, in the office of Representative James B. Utt (R., Calif.), who has received a letter from a constituent asking for information about [] who is being considered for a civil defense position in Utt's district. According to Mrs. Parker, [] claims to have been the head of CIA at one time. I advised Mrs. Parker that this was not the case and agreed to check and determine whether [] had ever served with the Agency or predecessor organization.
